To the Head of planning

I notice that there are plans of build extensions to roads and even more housing on greenbelt areas in South Warrington

I recall a time, and not long ago when much of South Warrington was beautifully green and pleasant. Very healthy and the environment was pleasing

Things changed. Now the pleasant fields are so built up that the various villages around the area cannot cope with the crowds out shopping. Stockton Heath village is a joke on a Saturday there is no room on the pavements for people. And the roads are always full of cars affecting the air quality around us

So, I am furious about these

proposed plans. At this rate and with this going on, there will be no more countryside left. Just extremely expensive housing estates and roads. It is being contradicted all that will be looked at with this Environmental discussion in Glasgow that we are being made aware of in the media.

It is madness to build on greenbelt. When I have noticed in the town much brown belt areas around the town that could contain housing including the about of houses that you plan to build on greenbelt. Why isn't this land being used?

From what I know, you have never consulted Environmental groups about these so called improvements, and by law, before you build on greenbelt land, you should consult these groups, for example if you build on greenbelt land that could be the habitat of endangered species, you could find yourself in serious trouble.

I am a member of Chesure Wildlife Trust and I am sure that the trust informed me a few months ago that there is a serious decrease of wildlife mainly places around Warrington on behalf of the Wildlife Trust you for making it worse.

Under the Freedom of Information Act, I need the postal address of the developer interested in building on the land proposed to be destroyed. A few people wish to express our concerns with him and we wish to make him see that not everything in life revolves around money and ~~that~~ <sup>how</sup> to obtain it and who he has to make it so. They want this land for personal wealth. They have enough already.

I am writing to some other people who may help about this. I will let you know the outcome.

I also need to see and speak to the person responsible for this idea.

I am really fed up of being seen as

Just a no body and a nothing by  
people in power. And this goes for other  
people who have the same views as  
myself over this subject

But we have some power, that being  
should this project of profit go ahead  
we can vote you out of office, and we will

Yours faithfully

Susan Moran
