**Date:** 06 November 2021 12:47:39

---

Good afternoon

I'd like to respond to the proposed plans for Winwick.

I'm objecting to the local plans firstly because of the traffic capacity. My house [REDACTED] already shakes excessively every time a larger vehicle goes past. The speed the of traffic is beyond ridiculous at times. We already based between two major motorways and that in its self can't be good for the air pollution. Especially when one of the motorways is closed it causes major traffic chaos traveling through Winwick.

Whilst I appreciate it makes a lot of jobs for the next couple of years, it will be extremely damaging to our climate and in the long run Winwick will be completely over run. The local school is already at maximum capacity. We are a village and we will loose that village status.

Wildlife is already in catastrophic decline due to human destruction 1.9 million Square metres of land has been lost since 2000.

The health and welfare of our children and the next generations should be paramount! We should be saving greenbelt.

Let Warrington be the leaders in this already troubled world, for our children's future, stop building, minimise pollution, save life, save our planet!
