Subject: Objection to Local Plan for Warrington
Date: 08 November 2021 09:45:23

To WBC Council Members.

I wish to make my objections known against the Local Plan as it stands at present and before it goes ahead for **Examination by Public**.

1. The amount of new dwellings & associated vehicles is clearly unsustainable.
2. I live near [REDACTED] & already the traffic has increased substantially making getting into Warrington & onto the M56 via the A49 that more time consuming. which you were warned about by the residents et al at the so called planning stage.
3. The resulting air quality problems caused by the increased traffic needs to be seriously considered & your proposed actions made clear to the residents of our area.
4. The development of much needed extra infrastructure such as medical Centres, Schools, Shops & Leisure Centres also need to be seriously considered & your proposed actions made clear to the residents of our area before ant approval is given.
5. Why have you not considered brown field sites, these are much less damaging to our green spaces & should & also need to be seriously considered & your proposed actions made clear to the residents of our area before ant approval is given before any approval is given.

I do not consider this plan has been properly considered & runs roughshod over the residents needs. The Local Plan is in my opinion not **SOUND** & needs a lot further work to address the issues above.

Yours Sincerely

Mr& Mrs J.S. Foster
