**Subject:** Local Plan (UPSVLP 2021) - South Warrington Urban Extension - Objection  
**Date:** 09 November 2021 17:37:48

---

I write to register my objections to the revised plan on the basis there is no justification for such a significant release of green belt with the loss of 1000 acres in South Warrington. This proposal is utterly at odds with the desperate need to protect our green spaces and meet the climate challenges we face in the next 15 years. Brownfield not Greenfield is the Government's stated intention, yet WBC continue to line developers pockets with scant regard for us as residents, or our environment.

- There is no justification for the predicted growth in housing.
- There is no need to destroy the character of our environment or our villages as already demonstrated by the grotesque Urban Splash Development, our objections to which were largely dismissed.
- There is no supporting infrastructure plan to support currently approved development, let alone another 4000 houses, with few viable options and a dependence on an inadequate road network and public transport system
- The plan does not adequately address development of the Town Centre or make it in any way a desirable place to visit.

In summary, No, No, No and No

Kind Regards  
Mary
