Re: Warrington Borough Council Local Plan Representation

Thank you for inviting representation on the Warrington Borough Council Local Plan from Warrington Clinical Commissioning Group (CCG). As the local commissioner of NHS services in Warrington the CCG has taken a keen interest in the Local Plan, how this has evolved and the proposed development areas within the plan.

Through our existing collaboration on town wide estates through them Transformation Estates Enabler Group (TEEG), we have worked closely with the Council in the preparation of the Local Plan, particularly when considering the impact on primary care services for the future. As such the CCG is confident that the provision of new and expanded primary care facilities can be made in a timely manner to support the level and location of proposed development.

The CCG will continue to work with the Council over the Plan Period to ensure existing and future residents of Warrington have ease of access to primary care services. In addition, we will also continue collaboration on the impact and access to other health infrastructure such as community and secondary care services.

Yours sincerely
