Subject: My objection.

The loss of Green Belt land is WRONG. The next generation will never forgive us. Once the Green Belt is lost, it is gone for ever. What happens to the wildlife - birds, animals, insects and wild plants, trees and hedgerows?

This is a beautiful area with villages which have an individuality and character of their own. I am afraid that this lovely area will end up as an urban sprawl.

The extra local traffic will result in pollution and traffic jams on already busy roads. Surely this cannot be right. The Climate Change Conference taking place in Glasgow has highlighted the danger of higher temperatures on our planet, and certainly more homes will mean more cars and more pollution.

I object most strongly to this revised Local Plan.

Wendy P Buckley
