Climate change is the concern of our times. We need trees. We need to protect the wildlife for our own sakes. The green belt is there for a reason. I have lived in Stockton Heath for 50 years. We tried to protect the green belt at Pewterspear, but all attempts failed. It seems to me that council and government do what they want anyway. Making our appeal is just a waste of time. May future generations forgive you. How will all the extra traffic affect our village?

HS2 though has nothing to do with you, will also destroy green belt and ancient woodland too. God created our beautiful world, but you are prepared to destroy it! You must take the responsibility. On your head be it.
