We reiterate Wrong business in the wrong place.

137 hectares of Green Belt already busy motor ways next to J20 where would the extra spaces for these vehicles to make there way to join the motorway.

Infrastructures have not been placed in the above plan because it would be impossible without carving up more green belt to access this site.

The green belt is required to keep the Carbon under ground and not above let's keep it that way.

Mr & Mrs Gerrard
