To Whom this may Concern,

I have recently been to see the revised Local Plans and have the following objections:

1. Loss of green belt land, whilst I agree with some areas of development are needed in the area and there are many options. I strongly object to the loss of green belt land. There are enough areas all around Warrington which can be used without eating into our green belts. Keeping these areas of green will help to maintain the current character of the existing developments and villages as well as supporting local ecosystems.
2. Infrastructure, the current infrastructure is at breaking point with every day there being a negative impact on the whole of Warrington. Warrington is regularly brought to a stand still when an incident on one of the surrounding main routes pushes traffic into and through Warrington. To add more development to Warrington without sorting out the current traffic problems would be madness. Never mind the inability for a further influx of traffic to cross the canal by the already deteriorating bridges.
3. Services, many of us are already struggling to access services and amenities. As a family we are already having to pay for a private dentist as no NHS dentist was available, we struggle to access our GP for a simple consultation and all of the surrounding schools are over subscribed and at breaking point just with the recent extra development of Edgewater park never mind to add more. Even if you can provide the structures where would the trained teachers, GP's and Dentists come from?

There is just not enough data and thought about the basics to warrant the proposed large development just yet. Solve the current problems before adding more.

In short I am opposed to the Local Plan in its current form.

Many thanks,

Shelley Millar [REDACTED]
