I strongly object to the updated proposed submission version local plan and loss of Warrington's Greenbelt. I think the plan is unsound and undeliverable. The amount of homes proposed in excess of the amount needed, nor will these be affordable homes which is what is needed.

This plan will ruin the local villages' character and merge them together. It proposes serious implications for the young people living in our villages at present - why get rid of their green space?

Furthermore, Warrington's road infrastructure is already not capable of coping with the heavy volumes of traffic. This plan will does not show how the local infrastructure will cope with a significant amount of extra traffic .

Warrington has one of the highest levels of pollution in the country. At a time when there is a huge importance to act on climate change, why would the destruction of greenbelt land be a viable option? It just doesn't make sense, especially with plenty of brownfield sites to explore such as Fiddler's Ferry.

I care about the future of Warrington and the health and well- being of its residents.
