Subject: Objection

Good evening,

I am emailing my concerns regarding the local plan.

Warrington does not have the infrastructure for all the proposed houses. The road network is not up to date with the amount of cars on the road. Some Infrastructure that is in place is dated and not maintained, the swing bridges are a disgrace, they need maintaining before an accident happens.

Warrington is in a great location regarding motorways however if there is an accident, this has a knock on affect throughout the whole area. We need a better road system.

There's not enough schools or doctors/dentists to cope with the new houses that are being built, the fact more are being added and still nothing is being done, especially in south warrington is appalling.

Brownfield sites need to be considered before the greenbelt.

Thanks for taking this time to read my objection.

Caroline
