**Subject:** Plan to build 300 homes on the green belt of Lymm

Hello,

I'm emailing you to voice my concerns about the proposal to build a further 300 homes on the green belt of Lymm.

I live in Lymm and believe that the village will not benefit from these plans and will only increase the pollution and add strain on public services.

The roads are already very busy and entering and leaving Lymm during rush hour is lengthy and unpleasant. I particularly enjoy walking but increased pollution from exhaust fumes makes this sadly, less enjoyable. I try to avoid congested areas but the prospect of more houses, increased residents and more cars is only going to increase the pollution.

GP surgeries and schools are already struggling with the current population of Lymm, so this will add to waiting times to access GP practices and possibly class sizes in schools.

The proposals do not appear to be attuned to the effects of climate change which is prevalent in our minds and critical right now.

I very much hope that this plan will be reconsidered, particularly for the younger members of our village so that they have a healthier future to look forward to.

Best regards,  
Diane Hemsworth
