Subject: Local Plan Objection

Hi

My name is Teegan and I am 13 years old. I like living in Thelwall and enjoy going for walks in the green space around me. I am concerned that building in Thelwall will destroy the natural habitat of local wildlife and trees which are important for the sustainability of our planet.

The traffic on the local roads by our house is busy and many cars travel above the speed limit. You can hear the M6 from our garden and already, the air quality in Warrington is poor. Adding more cars and a massive distribution centre at the motorway junction will only make the air that I breathe and the noise I can hear worse.

My school in Lymm is oversubscribed and I worry that children in the area will not have access to a good school and education. We need good local services and I wonder how these will be delivered and if there will be enough if there are more houses?
