Subject: Local planning

I am writing to ask if the correct sewage systems are in place to take the extra volume going to be created from the new homes. Also is the air quality going to suffer from the extra traffic
Next how long will the swing bridges last with the extra load going to be placed on them and have you got a system in place to cope with the traffic if not.
In the future with the (sue)culture you will have alot of claims for health (air quality) and sewage back up (no extra capacity) if these things are not taken seriously.
I take it with buy local we will still be able to produce local crops.

Yours in anticipation Mrs Warburton.nt from my Galaxy
