**Subject:** Warrington local plan

I would like to strongly object to the proposed local plan for the following reasons There should be no building on green belt.  
Brown field sites should be looked at if new buildings are required There will be an unacceptable level of poor air quality in the area, which is already poor to start with.  
This will destroy local ecology and habitat It will also destroy the character of villages and local landscape There is no justification for the predicted growth therefore no need for the number of houses required There is already poor transport infrastructure in south warrington, it could not cope with any extra levels This plan is not sound Julie Freeman Stewart Freeman
