**Subject:** Comments on the revised Local Plan

I wish to register my objections and firm NO to this plan.

As a country we have just hosted COP 26 and it has highlighted the damage we are causing to our planet. Your proposed plan will hugely increase road traffic on already congested roads in South Warrington adding to air pollution and destruction of the ozone layer. It will also irreversibly remove green land which could be used for agricultural purposes should a future need arise.

What are the justifications and exceptional circumstances for the predicted growth in housing and warehousing facilities built on Green Belt land? I believe that the environmental, ecological impacts and indeed the loss of mental health benefits to the population of Warrington caused by the removal of Green Belt land have not been properly assessed. Why are brownfield sites not being used as a priority as advised by national government?

Where are the specific plans for regeneration of the Town Centre which now contains a large proportion of empty buildings?

I repeat NO to this plan.
