Subject: Local plan objection

To whom it may concern

I am objecting to the new local plan along with over 3000 other local people. No consideration has been given to people that are living in South Warrington. Already surrounded by traffic pollution from two major motorways - the M56 and M6 these proposals will add to the pollution and the ill health of the local population, increasing respiratory conditions such as asthma and COPD. The thought of another 4200 and an additional commercial development will be catastrophic for the health of the local population and will increase and already congested area. The population in this area do not travel to work by walking, cycling and to be honest cannot use local transport due to the recent cuts on the bus service (unable to get a bus to Appleton or Stretton past 5.30pm is absolutely absurd!). Therefore another 4200 homes will just add to an already serious problem.

So not just the risk to the health of the population and increased traffic congestion but to even consider building on green belt land is just devastating. There is plenty of land available to build on that is NOT greenbelt. Why on earth would you want to destroy our greenbelt is beyond me. The residents have chosen this area carefully, to live in a semi rural area and then you want to come along and destroy it all. It is just not acceptable at all.

The junction at the Cat and Lion pub is already very heavily congested...some mornings it take me 10-15 minutes to get past the traffic lights to take my son to school and get to work, and OK 15 minutes may not seem that long but it is when it is just to get through one cross roads! The proposed plans will not be beneficial to the local residents and all of the traffic will be coming though a small village in all directions.

I would appreciate it if you could reconsider these plans as a matter of urgency.
