Subject: Local plan objection

Dear sir/madam

I am appalled at this proposal which still hugely disappoints .

I worried about air quality - it is already so bad here and this will make it worse. How does this fit in with climate change and health goals ?

The wildlife impact isn't clear but I can see the impact of the current grappenhall gets development already and there was very little to address this in the information .

Why even wreck our green belt before you have used brown belt . Areas like grappenhall will not provide significant enough yields of affordable housing vs use of green belt .

How does this tie in with the latest government guidance on use of green belt ?

I am unclear on the new road proposals, traffic is already terrible here ,there was no clarity in the details you shared.

The services in our area are inadequate, information on this was incomplete, you need to sort this out before progressing .

To be clear I strongly object to this proposal . Please advise on the above points

Regards

Charlotte Clifford
