**Subject:** Warrington Local Plan Consultation

Having read the original local plan, the revised local plan and attending our local parish council consultation events. I would like to add my voice to the many others who feel that revisions to the plan are minimal to say the least. It still fails to address the 5 key points from the National Planning Policy framework, the regeneration of brownfield sites, traffic congestion and air pollution problems. Not to mention the provision of additional schools and medical provision.
