Subject: WARRINGTON LOCAL PLAN Consultation

We voice our objection strongly to the latest ill thought out WARRINGTON BOROUGH COUNCIL'S Local Plan

How can the bulldozing of some 1000 acres of GREEN BELT LAND in South Warrington to build thousands of high end, high profit housing be justified? You provide no rationale for why this or the further ingress of commercial use into GREEN BELT LAND over BROWN FIELD SITES is warranted. Our community and the environment do not need more cars and lorries on our heavily congested roads commuting in and out of Warrington and accessing overburdened motorway junctions.

In this time of potentially disastrous consequences of Global Warming we need to be planning for the planting of more trees, encouraging environmentally sustainable agricultural practices so that we can become more viably self sufficient in local food production. Not, for ever destroying the land needed for this, covering it with tarmac and brick as you Warrington Borough Council will be doing! Is this the legacy that you our elected representatives really visualised for our future, well shame on you!

South Warrington cannot take anymore urbanisation without destroying the character and beauty of our villages and the destruction of GREEN BELT land. When will this continual probing planning assault on South Warrington stop, enough is enough!

Anne and Richard Payne
