Subject: Against Proposed Development MD4 & OS6

Hello,

I am against the proposed developments MD4 & OS6, along with the St Helens Parkside developments this will destroy the nature of the village. I live in [REDACTED], an often overlooked and ignored part of Warrington. Living on the 'S' bend give an excellent view of the chaos arctic lorries and regular congested 9-5 traffic causes in this area, with an increase in the pollution from slow moving vehicles. This road is already choked with traffic without the extra homes and business. There is constant damage to the kerbs, fences and hedges and damage to the phone line on more than one occasion.

- The impact on the roads of the extra traffic has been ignored, the one lane system causes jams as it is already.
- You're stealing more green belt without exceptional circumstances where brownfield sites exist, to add more traffic and pollution to an area already hit by these aspects.
- You've not considered schooling, healthcare or other local amenities which are crowded now.
- The rural lanes are in poor condition and not able to withstand current traffic load.
- The lack of attention and creation to local services.

--

Yours faithfully,
Phil Chadwick
