To: Local Plan
Subject: Local Plan Consultation

I am writing to voice my **opposition** to the local plan in its current form.

- Building further low density housing on the outskirts of the town is likely to only worsen the chronic issues with traffic congestion and difficulty accessing public services such as healthcare that currently impact the town. Responsible development would be focused on developing brownfield sites closer to the town centre, which could encourage a more sustainable pedestrian culture in the town and help revitalise the town centre.
- The Land Earmarked for development in South Warrington is some of the last green space available in the town. This space is crucial for wildlife (such as bats and skylarks that are often seen in the area) and provides a distinctive character to the area

Yours Sincerely,
William Oliver
