

November 10th 2021,

To whom it may concern,

I am writing to make an objection to the proposed Local Plan, which gives a basis for decisions up to 2038.

This plan seems to rely heavily on using Green Belt Land, especially in the area of South Warrington. This area is + should remain a semi rural area and must not lose its character and appeal as such unless there are no alternatives.

My husband and I love to walk the canals + footpaths of the area + are ~~at~~ already seeing the devastation of green areas along our walks.

The roads in this area are very busy now and this needs to be addressed now before any more building

is completed. More traffic means more pollution, which goes against all current thinking with global warming etc.

Please, please do not spoil our semi-rural area with ill considered proposals.

1. Keep using Green belt land to a minimum
2. Put infrastructure in place before increasing the number of new homes. Doctors, dentists, schools etc must be there for these additional numbers
3. Once green belt land is used its gone for ever.
4. Consider pollution, global warming etc.

In conclusion I wish my objection to be noted to the proposals as they stand at the moment. I am not against change when it has been honestly and carefully considered

Yours sincerely
Margaret Buckley.
